Tam Pham II

Software Engineer | Full-Stack Development

Fort Worth, TX 817.845.1242 phamt@live.com tampham.io linkedin.com/in/tamphamjr github.com/openbracketdevelopment

PROFESSIONAL SUMMARY

Software engineering and UI/UX design expert with 11+ years of experience creating reliable applications and intuitive digital experiences for international brands, businesses, and nonprofits. Combine deep technical expertise with user-centered design to turn complex requirements into accessible, scalable solutions. Lead projects from discovery and information architecture through development, testing, launch, and ongoing improvement. Bring hands-on leadership, thoughtful problem solving, and close collaboration with clients and cross-functional teams, while mentoring developers and maintaining high standards for quality and usability.

TECHNICAL SKILLS

LANGUAGES: **TypeScript, JavaScript, PHP,** SQL, Python, Go (Golang), Rust

FRONT END: **React, Next.js,** Svelte, HTML / CSS, Tailwind CSS, **Sass,** Responsive Design, Web Accessibility

BACK END & CMS: **Craft CMS,** WordPress, **Headless CMS, GraphQL, REST APIs, Webhooks,** Okta / OIDC, **PostgreSQL,** MySQL, SQLite, **Redis,** ISR

DEVOPS & CLOUD: Continuous Integration and Continuous Delivery (CI/CD), GitLab CI/CD, GitHub Actions, **Docker, Kubernetes,** Amazon Web Services (AWS), Linux, **Nginx**

TESTING & TOOLING: Automated Testing, **Jest, Storybook, Dynatrace, Splunk,** Incident Response, Secure Coding, Code Review, Technical Documentation

AI-ASSISTED DEVELOPMENT: **GitHub Copilot, OpenAI Codex, Claude Code,** Cursor, Prompt Engineering for Coding Workflows

PROFESSIONAL EXPERIENCE

Software Engineer · Amdocs

Plano, TX (Remote) · Aug 2024 – Present

- Lead Craft CMS developer for Fidium's enterprise web platform: own a headless CMS, page builder, GraphQL API, and custom modules serving seven websites and applications: fidiumfiber.com, fidiumbusiness.com, fidiumwholesale.com, fidiumpartners.com, consolidated.com, fidium.net (customer portal), and Buyflow (purchasing).
- Planned and drove delivery from foundation to launch, including the custom Craft modules that extend the platform.
- Introduced Redis caching alongside Incremental Static Regeneration (ISR) to reduce Craft CMS load from multiple production Kubernetes pods and improve React/Next.js response times.
- Redesigned and built the Next.js/React applications for Fidium Fiber, Business, Wholesale, Partners, and Consolidated, and built the original foundation of fidium.net; collaborate with the teams that own fidium.net and buyflow.
- Maintain shared components, hooks, and webhooks with Jest unit tests and Storybook documentation; built Fidium Fiber's Check Availability experience to guide customers into purchasing with a clear handoff to Buyflow.
- Configure Nginx reverse proxies for multiple sites from one repo; support GitLab CI/CD pipelines and Kubernetes deployments across dev, QA, staging, and production.
- Use Dynatrace and Splunk for performance and log visibility; provide on-call incident response for a shared platform supporting marketing, customer access, and purchasing.
- Partner with engineers, marketing, IT, and cloud ops in Jira; mentor developers on Craft CMS. Authored pull requests and reviewed other developers' PRs to maintain code quality.

Key achievement: Built a shared headless Craft CMS serving seven websites and applications across marketing, customer access, and purchasing; delivered Next.js sites for Fidium Fiber, Business, Partners, Wholesale, and Consolidated, plus the original fidium.net foundation.

Lead PHP / WordPress Developer · Linchpin
Rhode Island (Remote) · Apr 2024 – Aug 2024

- Led development and maintenance of WordPress sites built with ACF and custom Gutenberg blocks, plus custom plugins, optimized for performance and SEO.
- Modernized build tooling with Webpack and set up GitHub CI/CD pipelines using Husky and Release Please.
- Managed hosting and servers, including PHP upgrades and Nginx/Apache configuration; on call for production issues.
- Coordinated with developers, marketing managers, creative directors, and clients to deliver on expectations. Authored pull requests and reviewed other developers' PRs to maintain code quality.

Key achievement: Maintained and developed the Birth23.org, fluvalaquatics.com, and Nutrience.com websites.

WordPress Developer · Planit Advertising
Baltimore, MD (Remote) · Mar 2023 – Nov 2023

- Built custom WordPress sites and multiple custom Gutenberg blocks for the company template.
- Worked across dev, staging, and production with automated test and deploy pipelines (Git, Bitbucket); resolved server and pipeline issues.
- Produced custom HTML emails and animated banners; ran monthly maintenance, QA, and ADA compliance checks. Authored pull requests and reviewed other developers' PRs to maintain code quality.

Key achievement: Launched the new Toro Haven robotic mower site along with several other sites, on time and on budget.

Director of Interactive Services · Holmes Millet Advertising
Dallas, TX (On-site) · Oct 2015 – Mar 2023

- Designed, developed, and maintained responsive sites and custom themes/templates across Craft CMS, WordPress, and other platforms using PHP, Twig, and JavaScript, with ongoing support for agency and client needs.
- Led the interactive department: direction, training, and assignments for a team of developers, plus client meetings and project estimates.
- Configured and deployed dev, staging, and production environments, maintained enterprise Linux servers, and kept PHP, CMS, and code current.
- Collaborated with creative directors, developers, designers, animators, VFX artists, and clients, managing multiple projects against strict deadlines.
- Ran email campaigns and digital ads, and produced animated video and photography for clients.

Key achievement: Redesigned 3 agency websites, boosting traffic and clientele; doubled traffic for EarthX.org after its 2019 redesign; recognized for Best UI/UX Design in Dallas 2019–2022.

Web Developer · Pixel Clear Designs
Fort Worth, TX (On-site) · Dec 2014 – Jul 2015

- Designed and developed WordPress, PHP, HTML/CSS, and JavaScript sites, including migrations, mobile QA, responsive optimization, plugin integration, and launches.
- Created logos and brands for client sites and produced video and photography with developers and creative directors.
- Mentored new creative hires, ran WordPress training for clients, and staffed the customer service call desk.

Key achievement: Launched several websites, including ESPS Trailers, Dart Couriers, and Booher Consultants.

Network Systems Administrator · Ross & Matthews Law Firm
Fort Worth, TX (On-site) · Apr 2013 – Dec 2014

- Resolved help desk tickets, specializing in Microsoft workstation repair, and staffed the customer service call desk.
- Managed 80+ thin clients on IBM terminals and 100+ Windows XP/7 workstations; administered Active Directory and Microsoft Exchange.
- Maintained HP and Xerox printers and hosted company video conferences via GoToMeeting and Zoom.

Key achievement: Replaced all 100+ legacy thin clients with new units on upgraded hardware and migrated Windows desktop workstations from XP to Windows 7; briefly worked on a 5 Gbps internet connection.

IT Technician · E-lite Works
Fort Worth, TX (On-site) · Nov 2011 – Dec 2013

- Handled Windows PC repair and troubleshooting, built custom desktops, and managed parts inventory and sales.
- Performed virus removal (rootkits, spyware, and malware), upgrades, data backup and transfer, Windows installs and updates, and network troubleshooting.
- Provided follow-up support, met customer deadlines, and optimized desktop and laptop performance.

Key achievement: Built several custom desktop PCs to customer specifications.

SELECTED SOFTWARE PROJECTS

Independent projects; source code and current scope are available on GitHub.

ByteDown — Go (Golang), libvips, PostgreSQL

- Built an asynchronous Go/libvips pipeline that preserves originals and creates responsive JPEG/PNG, WebP, and AVIF outputs with PostgreSQL-backed jobs.
- Separated the API from a Svelte/TypeScript workshop; added processing deadlines, job leases, and fenced result publication.

SitePaladin — Rust, Axum, Tokio

- Built a Rust/Axum website auditor with bounded HTML crawling, page-level findings, SQLite persistence, and JSON/CSV exports.
- Implemented outbound destination and redirect validation, authenticated operator sessions, and crawl/audit unit tests.

Hook, Line & Sender — Python, FastAPI, PostgreSQL

- Built a Python/FastAPI webhook relay with durable PostgreSQL acceptance, Celery/Redis tasks, signed outgoing messages, and delivery-attempt history.
- Implemented bounded retries and lease recovery for at-least-once delivery to one configured demo receiver.

Daguerrify — Svelte, TypeScript, WebGL2

- Built a Svelte/TypeScript browser editor using WebGL2 and GLSL for local JPEG/PNG adjustments and full-resolution export.
- Implemented non-destructive settings, bounded undo/redo, before/after comparison, import limits, and image-pipeline tests.

EDUCATION

The Art Institute of Fort Worth
BFA, Web Design & Interactive Media · Graduated Sept 2014

- Award for Best Portfolio, Web Design Division
- Dean's Honor Roll

CERTIFICATIONS

- Best UI/UX Design Agencies in Dallas, 2019–2022
- Progress Sitefinity Developer Certificate, 2019
- Cursor: GenAI-Driven SDLC, Mar 2026
- Secure Coding: Secure Application Development, Jun 2026
- Principles of Secure Coding, Jun 2026
- Secure Web Application Programming, Jun 2026
- Securing GenAI Systems, Jun 2026
