Hello.

I am a highly motivated designer, developer and solutions expert with over 8 years of professional experience, primarily in Dallas. Now based in Fort Worth, I am seeking opportunities locally or remotely.

My expertise lies in crafting dynamic, responsive websites that prioritize scalability and performance. I excel in designing user experiences that are both functional and optimized for search engines. A fast learner, I have worked with diverse content management systems, including WordPress, Drupal, Statamic, and Shopify.

Beyond web development, I bring additional skills to the table—I am adept at shooting videos and photographs and creating animated content for various purposes. My goal is to contribute my skills and experience to enhance your team's capabilities.

Web

WordPress	HTML/CSS	Nexcess	Git	Lando

Work Experience

Planit Agency, Remote

Mar - Nov 2023 ——— WordPress Developer

- Developed custom WordPress sites with a focus on Gutenberg blocks, ensuring seamless integration and user-friendly experiences. Configured development, staging, and production environments while implementing effective pipelines for testing and deploying code between these stages. Leveraged local environment apps for core development and testing, utilizing git and Bitbucket for version control.
- Resolved various server and pipeline issues through troubleshooting efforts. Contributed significantly to the company's website template by creating multiple custom Gutenberg blocks. Actively participated in mandatory development team meetings.
- Demonstrated expertise in crafting custom HTML emailers and animated banners. Conducted monthly maintenance checklists for several websites, collaborating closely with senior developers, designers, and project managers. Performed rigorous quality assurance and bug testing for multiple sites, ensuring optimal functionality. Implemented ADA compliance measures for accessibility across various sites.

Holmes Millet Advertising, Dallas TX

2015 - 2023 ——— Director of Interactive Services

- Primarily designed and maintained well-functioning, responsive adaptive websites, offering ongoing technical support for agency and client needs. Developed custom WordPress themes and templates for both company and client sites.
- Led the interactive department, providing direction, training, and project assignments to a team of developers. Actively participated in client meetings within and outside of Dallas, TX, as well as mandatory company meetings.
- Collaborated with a diverse range of professionals, including creative directors, web developers, content managers, visual designers, 3D animators, VFX artists, agency partners, and clients.
- Produced and designed high-quality animated videos for various clients and brands. Captured video and photography using a Canon 5D Mark IV and Nikon D750.
- Managed daily organization of multiple projects, meeting strict deadlines and expectations, while continuously measuring and improving productivity. Designed and executed email marketing campaigns and digital ads for clients.
- Configured development, staging, and production servers. Created detailed estimates for all website-related projects.

Pixel Clear Designs, Fort Worth TX

2014 - 2015 ——— Web Developer

- Designed and developed websites primarily on WordPress, PHP, HTML/CSS, and Javascript. Conducted maintenance and troubleshooting, including website and database migration, mobile quality assurance, and successful website launches.
- Specialized in mobile and responsive design, optimization, and integration of WordPress plugins across all sites. Additionally, created logos and developed brands for various customer sites.
- Produced and edited videos for Pixel Clear clients, engaging in collaborative efforts with developers, creative directors, and graphic designers.
- Took on a mentoring role for new creative recruits, conducting performance evaluations. Executed photography and on-location photo shoots. Actively participated in meetings with both new and existing Pixel Clear clients.
- Provided WordPress usability training for clients and maintained a customer service call desk.

Ross and Matthews Law Firm, Fort Worth TX

2013 - 2014 ——— Network Systems Administrator

- Resolved and executed all incoming help-desk tickets, specializing in repairs on Microsoft workstations. Administered and networked with all Microsoft workstations and servers, managing a network of 80+ thin client computers connecting to IBM terminals and 100+ Windows XP and Windows 7 Pro workstations. Oversaw Active Directory and Microsoft Exchange responsibilities, including user account and password management, while also maintaining a customer service call desk.
- Conducted maintenance and repairs, including troubleshooting and resolving issues, on Hewlett Packard Printers and Xerox machines. Facilitated company video conference calls using Citrix GoToMeeting or Zoom. Actively participated in mandatory IT meetings for monthly help desk reviews.
